

Instruction manual for installation, usage and maintenance for products made of cultured marble

This instruction manual is related to washbasins, worktops with integrated washbasins, worktops under washbasins, washing troughs, slab tiles and products of cultured marble all type and size, made by company Mramorový efekt s.r.o. All products made of cultured marble are designed solely as sanitary furnishing for bathroom and hygienic facilities.

Installation of worktops under washbasins, worktops with integrated washbasins and washing troughs:

All products regardless of shape and size must be thoroughly supported by solid supporting mechanism as carrying wall, bathroom furniture, metal wall brackets or metal construction in such way as to avoid bending and possible product damage caused by static or dynamic weight load. In case of installation on wall the product must be fixed on a solid wall built of solid bricks, concrete etc. If wall brackets or metal supporting frame are used appropriate wall plugs and screws in compliance with building specification must be always used as well.

In case of installation on walls built of gypsum boards or any kind of insufficiently massive wall construction, such wall must be supported by appropriate kind of reinforced holding construction.

Maintenance of products made of cultured marble:

For cleaning products made of cultured marble is recommended to use:

- **liquid detergents specifically designed for maintenance of sanitary furnishings made of cultured marble**

We do NOT recommend:

- **to use sharp tools, polishing pastes, solvents or any chemical substances and detergents containing grinding particles where product surface might be damaged by cleaning with these substances**
- **to use hair dye or nail polishing in the close contact with product surface**

At accidental and short term contact of hair dye or nail polishing with product surface the immediate and careful cleaning with above mentioned liquid detergent for cultured marble and water is recommended.

At mechanical damage of product surface the repair after requirement might be offered. Please contact us by email referred in the bottom of this page.

Storage:

In case of storage the washbasins, worktops with integrated washbasins or washing troughs the products must not be supported but must be placed with the glazed, gelcoated side on a smooth and even surface (sink holes towards the ceiling).

Warranty:

We provide 60 months warranty for all products made of cultured marble. The warranty is related to material defects but not to commonly worn out products or any defects caused by product usage in breach of this Instruction manual. For other products which are not made of cultured marble or outsourced by company Mramorový efekt s.r.o. the warranty is provided for 24 months.
